>> Colorado Parks & Wildlife officials have been monitoring the effects of the spill on terrestrial & aquatic wildlife since the incident began. "We are watching for any impacts on wildlife, whether they are acute or chronic," said Patt Dorsey, southwest regional manager for CPW.

>> "Fish are especially sensitive to changes in water quality," she said.

>> "We are following a standard protocol and are monitoring sentinel fish at 3 stations in the Animas."

CPW is also monitoring a control station on a clean tributary.

>> Colorado Parks and Wildlife is optimistic that the effects of the spill on terrestrial wildlife will be minimal.
